

MANDA DEVAN ROHITH

.NET Full Stack Developer | C# & ASP.NET

8143145043 | devanrohith123@gmail.com | Tanuku, AP 534211 | [linkedin.com/in/devanrohith](https://www.linkedin.com/in/devanrohith)

PROFESSIONAL SUMMARY

Results-driven .NET Full Stack Developer with 3+ years of professional experience designing, developing, and deploying scalable enterprise and web applications. Advanced proficiency in C# and the .NET ecosystem (ASP.NET Core, ASP.NET MVC, Entity Framework Core). Proven expertise in object-oriented programming (OOP), SOLID principles, design patterns. Strong record of collaborating independently with distributed, cross-time-zone teams in remote-first agile environments. Skilled in JWT security, SQL Server optimization, and RESTful API design. Track record of mentoring junior developers, leading code reviews, and delivering high-quality, well-documented software.

TECHNICAL SKILLS

Languages:	C#, JavaScript, HTML5, CSS3, SAP ABAP
Frameworks:	ASP.NET Core, ASP.NET MVC, Entity Framework Core
Design Patterns:	Repository, Factory, CQRS, Dependency Injection, Singleton, Strategy
Databases:	MS SQL Server (stored procedures, triggers, indexing, query tuning)
API & Integration:	REST APIs, JWT authentication, XML, JSON
Architecture:	OOP, SOLID principles, clean layered architecture, microservices awareness
BI & Tools:	Power BI, IIS Web Server, Visual Studio
Soft Skills:	Remote collaboration, cross-time-zone communication, mentoring, leadership, conflict resolution

WORK EXPERIENCE

HCLTech | Vijayawada, Andhra Pradesh

Mar 2025 – Present

.NET Full Stack Developer – Software Engineer

- Designed and developed end-to-end .NET application modules independently within a remote, distributed global team spanning multiple time zones, ensuring consistent delivery across shifts.
- Architected scalable backend services using ASP.NET Core and C#, applying SOLID principles, Repository pattern, and CQRS for clean, maintainable layered architecture.
- Built and consumed REST APIs with JWT authentication and role-based access control (RBAC), securing multi-tenant enterprise workflows.
- Developed high-performance SQL queries, stored procedures, and indexing strategies, reducing report query execution time by ~40%.
- Led performance enhancement initiatives — profiled APIs, applied caching, and reduced latency in high-load modules.
- Conducted root-cause analysis (RCA) on production incidents; applied patches and improved system resilience.

Infionic | Hyderabad, Telangana

Apr 2024 – Mar 2025

.NET Full Stack Developer – Software Engineer

- Designed and enhanced scalable web applications using ASP.NET Core, C#, and Entity Framework Core in a product-based environment, working independently in a remote-friendly setup.
- Applied design patterns (Repository, Factory, Dependency Injection) and SOLID principles to ensure modular, testable codebases.
- Wrote unit tests using NUnit following TDD methodology; maintained >80% test coverage on critical business modules.
- Implemented front-end features using HTML5, CSS3, and JavaScript for optimized user experience.
- Deployed .NET applications on IIS Web Server and Azure App Services; managed environment variables, configuration settings, and Azure Key Vault secrets.
- Contributed to Azure DevOps CI/CD pipelines; managed PR workflows, code reviews standards across distributed teams.

- Implemented data encryption, JWT authentication.
- Mentored junior developers on coding standards, TDD practices, design patterns, and .NET best practices improved team code quality and review throughput.
- Configured and documented solutions for data-intensive systems and complex business workflows, maintaining long-term maintainability.

SmartGig Technologies | Hyderabad, Telangana

May 2023 – Jan 2024

.NET Full Stack Developer – Software Consultant

- Led full-stack development of scalable web applications using ASP.NET MVC, C#, jQuery, JavaScript, AJAX, and SQL Server, delivering on-time across cross-functional remote teams.
- Designed relational database models and created stored procedures, indexes, and performance-tuned queries for high-volume data operations.
- Integrated application modules with backend systems via REST APIs, ensuring secure and reliable data exchange.
- Applied OOP and SOLID design principles; implemented logging, exception handling, and robust validation for system stability.
- Assisted in IIS deployment, configuration management, and build automation; worked with DevOps teams on Git-based PR and versioning workflows.
- Coordinated directly with QA and product teams to clarify requirements, validate business logic, and ensure quality releases.
- Documented system behavior, feature specifications, DB schemas, and API contracts for long-term maintainability.

KEY PROJECTS

Reddy Ice | *ASP.NET Core, C#, Entity Framework, SQL Server, Azure DevOps*

- Developed and managed a full-stack Enterprise Resource Planning (ERP) system; designed responsive UI (HTML, CSS), implemented backend business logic in C#, and integrated SQL Server with Entity Framework Core.
- Applied SOLID principles, Repository pattern, and CQRS for a clean, scalable architecture; implemented JWT-based authentication and RBAC.
- Used Azure DevOps for CI/CD pipeline management; deployed to Azure App Services with Azure SQL Database integration.

PI Agri (Financial Management Platform) | *ASP.NET Core, C#, JavaScript, SQL Server*

- Built a financial management platform with full-stack .NET capabilities; authored C# backend logic for financial automation, data analysis, and high-performance SQL Server query optimization.
- Applied TDD using xUnit for financial calculation modules; led documentation efforts capturing functional requirements, workflows, and API contracts.

EDUCATION

Bachelor of Technology – Information Technology

CGPA: 8.1

Vishnu Institute of Technology, Bhimavaram, AP | 2019 – 2023

ADDITIONAL INFORMATION

Available for remote collaboration across US, EU, and APAC time zones. Experienced in agile ceremonies: sprint planning, daily stand-ups, and retrospectives.
